

Rotating Angle

Electric Diagram:

REMARK:

1. The operating temperature above is at 25° C ambient temperature (temperature around the switch body), if the ambient temperature changes , the operating temperature need to be modified.
2. Mounting screws must not touch thermostat body. Please use screws with proper length (5mm recommended).

Technical Parameter

- H/off: 200±8° C
  L/off: (50° C)
- Breaking capacity
  2-T2 32A/250V～ Life >100,000 Cycles
- Minimum current: 200mA
- Dielectric Strength: AC 2000V 1min
- Insulation Resistance: >100MΩ
- Temperature change speed: <1.0° C/min
- Maximun temperature:
  Around the Switch Body T125° C
  Around the Sensing Bulb 230° C
- Adjustment Shaft: <0.2Nm
